DN series batteries have innovative dual housing structure: the inner cell cage and outer anti-shock housing. The new structure makes the battery quite strong, anti-shock, protects the battery from drop-off accident.

Industry standard Power Tap& USB output(5V, 1A) can fit to On-board Camera Light and other accessories. Before using the USB output, long press the LED check button for 3 seconds to activate it.

The battery supports Max 6A charging current, halving the charging time. For example the 310Wh level battery can be charged to full within 4.5 hours by Dynacore new fast charger DD-2S/A. And the high quality contact pins ensure the reliable and safe condition under 6A current.
